

SUPER SQUISHY FIDGET BAG

Watch as the color capsules burst and combine to create exciting new colors. This DIY fidget toy is a great way to enhance your focus and relax your mind.

SET UP

Adult assistance required for set up. Not suitable for children under 6. Supervise children to ensure the fidget bag remains sealed at all times.

IMPORTANT: We include enough magic color capsules to fill 1 bag. Do not remove capsules from the fidget bag. While magic color capsules are non-toxic, do not eat capsules or place in mouth, nose, or ears.

1
Insert all the glitter and confetti into the open spout.

2
Working at a sink, carefully pour 4 cups (0.2L) of warm tap water into the bag, lifting the spout as you pour.

3
Seal the bag tightly, removing as much air as possible. Watch as the magic color capsules melt and create bursts of colorful gel.

NOTE: It will take a few minutes for the magic color capsules to absorb the water and become squishy. You can start to play with it as soon as it is filled and sealed. The outside of the pad can be wiped clean with warm water.

4
When the bag starts to feel squishy, add the fidget mix-ins, sealing the bag tightly again.

Disposal instructions: Do not dispose of gel down the sink. When finished, remove and rinse the items you wish to keep and pour the remaining gel into a trash can. Repurpose the bag to make your own fidget activity.
