# FLOATING SOLAR LIGHTS IJF-587

Read this manual carefully and follow the care instructions.

Save this document for future reference.

PLEASE CHARGE FOR 8+ HOURS BEFORE FIRST USE

Do **NOT** place the solar panel in shaded areas

Do **NOT** charge the solar panel behind glass

Clean the plastic casing frequently

## **HOW SOLAR LIGHTS WORK**

During the day, the solar panel converts solar energy into electricity and stores it in the rechargeable battery. At night, the light turns on automatically via a light detecting sensor built into the unit. How long the light illuminates will depend upon the location of the light, weather conditions, and how much direct sunlight the solar panel is exposed to. Ensure the power is switched to 'ON' while charging.

## CHOOSING THE RIGHT LOCATION

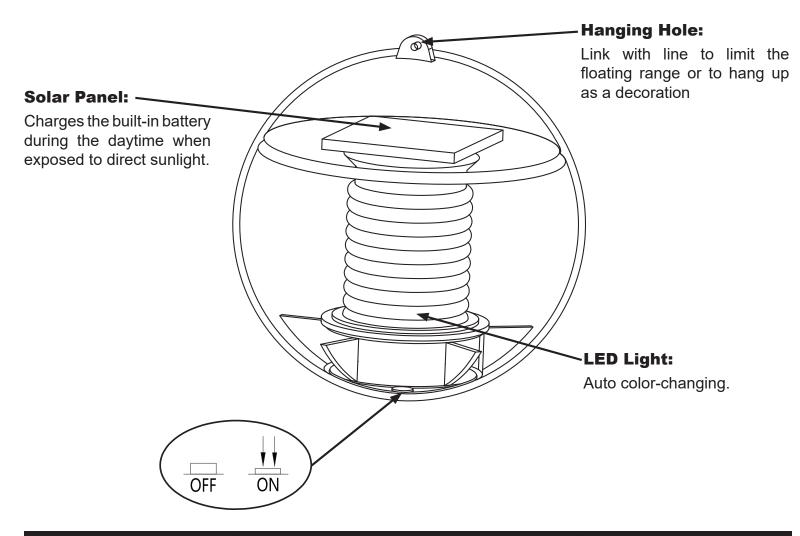

- Select an outdoor location where the solar panel will receive at least 6-8 hours of full, direct sunlight each day. Ensure the solar panel does not become shaded by trees, shrubs or buildings throughout the day as this will influence the charge of the battery and shorten the working time at night.
- Avoid locations with nighttime light sources nearby, such as street or porch lights. When the light detecting sensor receives too much ambient light, the lights will not illuminate.

## **OPERATION**

Switch the power to the 'ON' position and place the lights in a sunny location.

**First Time Use:** The light will require at least 8 hours of full, direct sunlight to fully charge the battery. Make sure the unit is turned 'ON' while charging.

As long as the battery has a sufficient charge, the lights will automatically illuminate when it gets dark.

## 🚹 IMPORTANT INFORMATION 🗘

#### **USE & CARE**

- · For outdoor use only.
- Keep away from children this is not a toy!
- Keep the outer casing by gently wiping it with a soft, damp cloth. Clean and clear casings allow solar panels to absorb more sunlight.
- · Never use chemicals or abrasive materials to clean the lights.
- Store in a dry, warm, indoor location during inclement weather and freezing temperatures.
- Do not allow the unit to freeze. Freezing temperatures will damage the internal components.
- Turn the units off before storing.

#### **TROUBLESHOOTING**

- Ensure the power button is turned to the 'ON' position.
- This product is designed to only illuminate at night. Make sure the light sensor is not receiving too much ambient light.
- If the light only works for a short time, attempt a 'Boost Charge':
  - Turn the power 'ON' and place in a location where the solar panel receives direct sunlight for at least 8 hours.
  - Turn the power 'OFF' at night to conserve the battery.
  - Repeat this process for 2-3 days.

This product uses a rechargeable battery. When the battery can no longer be used, it should be removed from the unit and recycled. The battery must not be incinerated or composted. Recycle the battery in accordance with local laws and regulations.

Any modification to the product or failure to follow recommended care will void the product warranty.
