

QUESTION

1. A patient with a long history of alcohol abuse presents with a 2-week history of weight loss, anorexia, and weakness. The patient has a 30-year history of alcohol abuse, with a daily intake of approximately 100 g of alcohol. The patient has a history of chronic liver disease, with a recent diagnosis of cirrhosis. The patient has a history of chronic pancreatitis, with a recent diagnosis of pancreatic cancer. The patient has a history of chronic kidney disease, with a recent diagnosis of end-stage renal disease. The patient has a history of chronic heart disease, with a recent diagnosis of congestive heart failure. The patient has a history of chronic lung disease, with a recent diagnosis of chronic obstructive pulmonary disease. The patient has a history of chronic depression, with a recent diagnosis of major depressive disorder. The patient has a history of chronic anxiety, with a recent diagnosis of generalized anxiety disorder. The patient has a history of chronic pain, with a recent diagnosis of fibromyalgia. The patient has a history of chronic fatigue, with a recent diagnosis of chronic fatigue syndrome. The patient has a history of chronic insomnia, with a recent diagnosis of primary insomnia. The patient has a history of chronic headache, with a recent diagnosis of tension headaches. The patient has a history of chronic dizziness, with a recent diagnosis of benign paroxysmal positional vertigo. The patient has a history of chronic tinnitus, with a recent diagnosis of noise-induced hearing loss. The patient has a history of chronic hearing loss, with a recent diagnosis of age-related hearing loss. The patient has a history of chronic vision loss, with a recent diagnosis of glaucoma. The patient has a history of chronic nosebleeds, with a recent diagnosis of chronic rhinitis. The patient has a history of chronic cough, with a recent diagnosis of chronic bronchitis. The patient has a history of chronic asthma, with a recent diagnosis of severe asthma. The patient has a history of chronic sinusitis, with a recent diagnosis of chronic rhinosinusitis. The patient has a history of chronic ear pain, with a recent diagnosis of otitis media with effusion. The patient has a history of chronic ear discharge, with a recent diagnosis of otitis externa. The patient has a history of chronic ear ringing, with a recent diagnosis of tinnitus. The patient has a history of chronic ear fullness, with a recent diagnosis of earwax impaction. The patient has a history of chronic ear itching, with a recent diagnosis of allergic rhinitis. The patient has a history of chronic ear pain, with a recent diagnosis of otitis media with effusion. The patient has a history of chronic ear discharge, with a recent diagnosis of otitis externa. The patient has a history of chronic ear ringing, with a recent diagnosis of tinnitus. The patient has a history of chronic ear fullness, with a recent diagnosis of earwax impaction. The patient has a history of chronic ear itching, with a recent diagnosis of allergic rhinitis.

System	Findings	Diagnosis
General	Weight loss, anorexia, weakness	Chronic liver disease, chronic pancreatitis, chronic kidney disease, chronic heart disease, chronic lung disease, chronic depression, chronic anxiety, chronic pain, chronic fatigue, chronic insomnia, chronic headache, chronic dizziness, chronic tinnitus, chronic hearing loss, chronic vision loss, chronic nosebleeds, chronic cough, chronic asthma, chronic sinusitis, chronic ear pain, chronic ear discharge, chronic ear ringing, chronic ear fullness, chronic ear itching
GI	Weight loss, anorexia, weakness	Chronic liver disease, chronic pancreatitis
Renal	Weight loss, anorexia, weakness	Chronic kidney disease
Cardiac	Weight loss, anorexia, weakness	Chronic heart disease
Respiratory	Weight loss, anorexia, weakness	Chronic lung disease
Psychiatric	Weight loss, anorexia, weakness	Chronic depression, chronic anxiety
Musculoskeletal	Weight loss, anorexia, weakness	Chronic pain, chronic fatigue
Neurological	Weight loss, anorexia, weakness	Chronic insomnia, chronic headache, chronic dizziness, chronic tinnitus, chronic hearing loss, chronic vision loss
Otolaryngology	Weight loss, anorexia, weakness	Chronic nosebleeds, chronic cough, chronic asthma, chronic sinusitis, chronic ear pain, chronic ear discharge, chronic ear ringing, chronic ear fullness, chronic ear itching

2. A patient with a long history of alcohol abuse presents with a 2-week history of weight loss, anorexia, and weakness. The patient has a 30-year history of alcohol abuse, with a daily intake of approximately 100 g of alcohol. The patient has a history of chronic liver disease, with a recent diagnosis of cirrhosis. The patient has a history of chronic pancreatitis, with a recent diagnosis of pancreatic cancer. The patient has a history of chronic kidney disease, with a recent diagnosis of end-stage renal disease. The patient has a history of chronic heart disease, with a recent diagnosis of congestive heart failure. The patient has a history of chronic lung disease, with a recent diagnosis of chronic obstructive pulmonary disease. The patient has a history of chronic depression, with a recent diagnosis of major depressive disorder. The patient has a history of chronic anxiety, with a recent diagnosis of generalized anxiety disorder. The patient has a history of chronic pain, with a recent diagnosis of fibromyalgia. The patient has a history of chronic fatigue, with a recent diagnosis of chronic fatigue syndrome. The patient has a history of chronic insomnia, with a recent diagnosis of primary insomnia. The patient has a history of chronic headache, with a recent diagnosis of tension headaches. The patient has a history of chronic dizziness, with a recent diagnosis of benign paroxysmal positional vertigo. The patient has a history of chronic tinnitus, with a recent diagnosis of noise-induced hearing loss. The patient has a history of chronic hearing loss, with a recent diagnosis of age-related hearing loss. The patient has a history of chronic vision loss, with a recent diagnosis of glaucoma. The patient has a history of chronic nosebleeds, with a recent diagnosis of chronic rhinitis. The patient has a history of chronic cough, with a recent diagnosis of chronic bronchitis. The patient has a history of chronic asthma, with a recent diagnosis of severe asthma. The patient has a history of chronic sinusitis, with a recent diagnosis of chronic rhinosinusitis. The patient has a history of chronic ear pain, with a recent diagnosis of otitis media with effusion. The patient has a history of chronic ear discharge, with a recent diagnosis of otitis externa. The patient has a history of chronic ear ringing, with a recent diagnosis of tinnitus. The patient has a history of chronic ear fullness, with a recent diagnosis of earwax impaction. The patient has a history of chronic ear itching, with a recent diagnosis of allergic rhinitis.
