

## Step 4: Add wiggly eyes

Push them into the clay until they stick.

### Helpful Tips:

Use any leftover clay to create plants or creatures to add to your prehistoric environment.

If your dinosaurs need help standing or balancing, try experimenting with the clay placement. Add a little more (or less) clay to the feet, legs, head or tail as needed.

Now you can play with your dinosaurs! To keep them looking great, be sure your play surface is clean.

**CREATIVITY**  
**counts®**

Creativity Can™ develop the skills needed to achieve lifelong success.

Creativity develops children's problem solving and critical thinking skills – it's the catalyst for invention, innovation and ideas that influence the future.

Dinosaurs to Life!

### Did you know...

**Tyrannosaurus Rex** means 'Tyrant Lizard'. T-Rex was one of the biggest meat eaters.

The meaning of **Triceratops** is 'three-horned face'. Triceratops had nose horns that were used for defense.

The name '**Stegosaurus**' comes from the Greek words 'stegos' which means roof and 'sauros' means lizard. They were herbivores (plant eaters).

**WARNING:**  
CHOKING HAZARD - Small parts.  
Not for Children under 3 years.

## Important Information About the Clay

- Make sure your hands and work surface are clean.
- Wear a smock or old clothes and cover your work surface. The clay may stain fabric, furniture or other surfaces.
- Ask an adult if you need help opening the clay packs.
- Wash hands with soap and water after playing with the clay.

**Note:** Although the clay is non-drying, store it in a plastic bag when not in use.

## Step 1: Choose a dinosaur fossil

## Step 2: Cover it with clay

**Mixing Clay Colors:** Soften your clay by squeezing and smooshing it. Try creating a marble effect by using two different colors of clay, squishing and twisting them together. Continue blending to create your own color.

Use your hands or the tools to cover the fossils with clay.

**Pro Tips:** It is easier to cover your fossil if you flatten the clay first.

You can leave some of the parts of the fossil showing.

## Step 3: Add designs and texture

**Polka Dots:** Roll small pieces of clay in a circular motion. Smoosh them down to flatten.

**Stripes:** Roll the clay back and forth, until you get a thin rod.

**Shapes:** Mold other fun details with your hands or the clay tools.

**Texture:** Use the tools to add texture and patterns. Sculpt scales, dimples, lines or any designs you can imagine.
