- Use to install new wheel studs, when they've been damaged, broken, or stripped
- Works on most automotive and truck wheel studs, domestic and imports
- The attached bearing reduces friction allowing the replacement stud to be easily pulled into the hub
- Prevent damage to the lug nut or

- the threads of a new wheel stud
- Use with impact wrench or ratchet, to pull the new stud securely in place
- Size 9/16 in. (14 mm) in diameter, works on most all automotive and half-ton pickup truck wheel studs
- Size: 7/8 in. (22 mm) in diameter, work on truck wheel studs
