

Liposomal Vitamin C

Optimized Absorption

- 1000 mg of vitamin C per two-softgel serving
- Liposomes encapsulate vitamin C in a highly bioavailable lipid bilayer, exceeding plasma levels with standard supplements
- Liposomes increase both the peak plasma levels and total vitamin C absorption
- Gentle form of vitamin C
- Potent antioxidant, also providing immune, collagen, and bone support
- Non-GMO and gluten-free

Code: 9412, 9413 **NPN:** 80121161
Size: 90, 180 Softgels
Actual Size: 25.61 mm x 7.92 mm

PRODUCT SUMMARY

Liposomal Vitamin C is a highly bioavailable form of this essential antioxidant known to protect against oxidative damage, support healthy immune function, and play an essential role in collagen synthesis. Vitamin C is a cofactor for prolyl and lysyl hydroxylases, enzymes needed for collagen development in joints and bones. A higher intake of vitamin C has been associated with a reduced risk for osteoporotic fracture and an increase in bone mineral density. Vitamin C increases iron absorption, stabilizes vitamin E and folic acid, and attenuates inflammation. A greater risk for deficiency has been identified in a number of populations, including older adults, individuals with inflammatory bowel disease, cancer, or food allergies, and tobacco smokers. Vitamin C supplementation enhances immune function and is associated with a shorter duration of respiratory tract infections, such as the common cold. Supplementation has also been associated with improved liver function and glycemic control in non-alcoholic fatty liver disease (NAFLD).

Liposomes encapsulate vitamin C in a phospholipid bilayer, bypassing typical limitations of absorption and increasing plasma ascorbic acid levels to a greater degree than typical supplementation. Liposomal forms of vitamin C have been shown to nearly double the bioavailability while retaining the safety of standard ascorbic acid supplementation.

LIPOSOMAL VITAMIN C OPTIMIZED ABSORPTION

Serving Size: 2 Softgels

Servings Per Container: 45/90

Each Capsule Contains:

Vitamin C (ascorbic acid, sodium ascorbate) 500 mg

Non-medicinal Ingredients: Softgel (gelatin, glycerin, purified water, carob powder), flaxseed oil, phospholipids, yellow beeswax.

Recommended Dose (Adolescents 9–18 Years and Adults 18 Years and Older): 2 softgels daily or as directed by a health care practitioner. Keep out of reach of children.

Recommended Use: Helps support immune function, prevent vitamin C deficiency, and maintain the body's ability to metabolize nutrients. Helps in collagen formation to maintain healthy bones, cartilage, teeth, and gums. Source of antioxidants that help protect against free radicals. A factor in the maintenance of good health.

Contraindications: Vitamin C supplementation is contraindicated in blood disorders such as thalassemia, glucose-6-phosphate dehydrogenase (G6PD) deficiency, sickle cell disease, and hemochromatosis. Vitamin C should be used cautiously in oxalate nephropathy or nephrolithiasis, as acidification by ascorbic acid increases the chances of precipitation of cysteine, urate, and oxalate stones, particularly in men.

Drug Interactions: No known contraindications. Some medications deplete vitamin C, and supplementation may mitigate adverse effects, including aspirin, indomethacin, oral contraceptives, tetracyclines, and corticosteroids.

Contains no artificial colours, preservatives, or sweeteners; no dairy, starch, sugar, wheat, gluten, yeast, egg, fish, shellfish, tree nuts, or GMOs. Sealed for your protection. Do not use if seal is broken. For freshness, store in a cool, dry place.
