

Refurbished ASL Arm: Limited Warranty

The following is a summary of Wastebuilt Environmental Solution, LLC's ("Wastebuilt") limited warranty of its Refurbished ASL Arm service and Installed Products. The complete limited warranty can be found in the [Wastequip Terms and Conditions of Sale](http://www.wastequip.com/terms-conditions-sale) ("WQ T&C") at: www.wastequip.com/terms-conditions-sale, the terms of which are included in this summary. You may obtain a hardcopy of the WQ T&C if you request one. If this summary and the complete limited warranty conflict, the terms of the WQ T&C will apply.

Wastebuilt will fix any operational failures caused by Wastebuilt's defective workmanship or materials for twelve (12) months after it completes the service. It will also honor the warranty for any Installed Products as per the limited warranty. If any parts are found to be defective, Wastebuilt will repair or replace them at its discretion. Repaired or replaced parts do not get a new warranty period. They are only covered for whatever time is left in the part's original warranty period.

The warranty doesn't cover damage caused by changes made to the equipment, negligent or abusive use, normal wear and tear, or those items listed in Schedule A (below).

Wastebuilt will pay 70% of its current regional labor rate for any warranty labor performed by you that is pre-approved by us.

The warranty does not cover any additional damages or losses that you might experience, including, but not limited to lost time or lost profits. Additionally, Wastebuilt will not be responsible for any complaints or legal claims made by your customers, end users or other third parties related to the covered product or service.

Wastebuilt doesn't provide any other warranty, including warranties of merchantability or fitness for a particular purpose. Some states have laws that may affect this warranty and Wastebuilt will comply with all applicable laws.

Following are descriptions of some example situations where this limited warranty does not apply. This is not a comprehensive list of examples and others may apply.

SCHEDULE A

EXAMPLES OF NORMAL WEAR AND TEAR	EXAMPLES OF ALTERATIONS, NEGLIGENT OR ABUSIVE USE
Scratches - normal use may cause scratches	Alteration of the original design, functionality or integrity of the ASL Arm
Dirt, including accumulation of dirt or any other substance	Vandalism
Normal deterioration during service	Cuts or scores from any source
	Extraordinary impacts such as being hit by a vehicle
	Burns, scorches, melting, or any damage from excessive heat
	Failure to follow manufacturer instructions or specification
	Chemicals - being exposed to solvents, petrochemicals, paints, acids, or other chemical substance which damages plastic or metal parts
	Removal of the serial number stamped on the arm during the refurbishment
