

STERILE ALCOHOL PREP PADS

Dynarex Sterile Alcohol Prep Pads are designed to safely cleanse and prepare skin prior to injection or venipuncture. These premium-quality Pads are saturated with 70% isopropyl alcohol to help fight bacteria and germs and reduce the risk of contamination. These 1-ply, non-woven Prep Pads are soft and absorbent for improved effectiveness. The Pads are designed for single use and sealed in sterile pouches for optimal hygiene.

- Sterile pads designed to safely prepare skin prior to injection or venipuncture
- Saturated with 70% isopropyl alcohol for effective antibacterial action
- Soft, non-woven prep pads provide improved absorbency
- Single-use, and sealed in sterile pouches for optimal hygiene
