

Diversey™

suma®

Third Sink Sanitizer

D4
Plus

Super concentrated quaternary sanitizer for use in manual warewashing.

Features & Benefits

- Superconcentrated for unsurpassed use rates and end use economy
- Precise, reliable dosing system
- Simplifies warewashing procedure
- Controls use rates and chemical costs

Applications

- For use with the Divermite® System
- Completely self-contained, no water or electrical hook-up

Suma[®] Third Sink Sanitizer

Use instructions

- The Divermite[®] System offers total integration of product, package, and dispenser.
- Dosage is adjusted by the Diversey representative according to sink volume.
- Simply depress the Divermite[®] plunger while third sink is filling with water.
- To prepare a 200 ppm active quaternary solution, dilute Suma[®] Third Sink Sanitizer at a rate of 4 ml per 10 liters of water (1:2500).
- Push the Divermite button as sink fills with water to obtain target active solution.
- To sanitize pre-cleaned mobile items in public eating establishments (drinking glasses, dishes, eating utensils), immerse items in a 200 ppm active quaternary solution for at least 60 seconds making sure to immerse completely. Remove items, drain the use-solution from the surface and air dry. Do not rinse.
- Avoid contamination of food during use or storage.
- **For Food Plant Use:** When used as directed, a potable water rinse is not required. If used at a higher concentration (>200 ppm), all food contact surfaces must be rinsed with potable water after treatment with this product.

Safe handling

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use; and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDS are available online at www.diversey.com or by calling 888.352.2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
