

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms and the underlying causes of the problem. Once the problem has been defined, the next step is to gather information about the problem. This involves identifying the stakeholders who are affected by the problem and the resources that are available to address the problem. The final step in the process is to develop a solution. This involves identifying the best course of action to address the problem and implementing the solution.

2. The second step in the process of identifying a problem is to gather information about the problem. This involves identifying the stakeholders who are affected by the problem and the resources that are available to address the problem. The final step in the process is to develop a solution. This involves identifying the best course of action to address the problem and implementing the solution.

Table with 3 columns and 5 rows		
Column 1	Column 2	Column 3
Row 1	Row 1	Row 1
Row 2	Row 2	Row 2
Row 3	Row 3	Row 3
Row 4	Row 4	Row 4
Row 5	Row 5	Row 5

PROBLEMS

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms and the underlying causes of the problem.
