Blend ingredients and scent to create 6 hatching
dragon egg bath fizzies. Hide a magic grow capsule
inside for a secret surprise!

Before you begin, read all instructions carefully.

Note: Craft with caution! Ask for adult permission and assistance before you begin. Please read all warnings and cautions before use. For external use only. Keep all materials away from nose, eyes and mouth. Make sure hands and workspace are clean and dry before you begin.

• Our Fizzy Formula is made from household ingredients including Citric Acid (found in lemons), Corn Starch and Epsom Salts.

Mix & measure carefully! When too much water is added, the mixture will quickly bubble. If placed in a sealed container, it can build pressure and burst. Only use the dragon egg molds provided in this kit.

SENSITIVE SKIN WARNING:

If you experience any redness or skin irritation, discontinue use.

DO NOT APPLY AROUND EYES.
DO NOT APPLY ON LIP AREA.

WARNING: Read cautions on individual containers carefully.
Not to be used by children except under adult supervision.

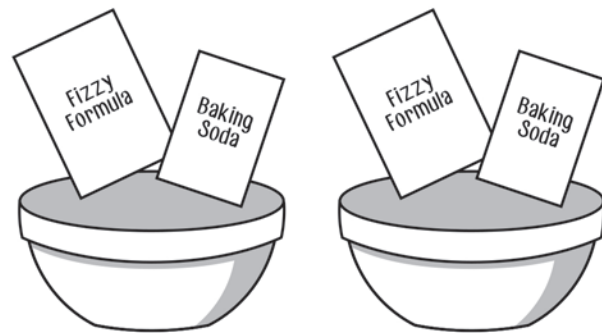

Make your bath fizzies

- You will need 3 mixing bowls and a small amount of water.
- Making bath fizzies is like baking a cake. You have to follow the instructions & measure carefully to have a successful outcome.

If you need extra help, you can visit our YouTube channel at www.youtube.com/user/FaberCastellUSA. There you will find a step-by-step video to guide you. Remember, you can start and stop the video as needed. Be sure to ask for adult permission and assistance before visiting our website.

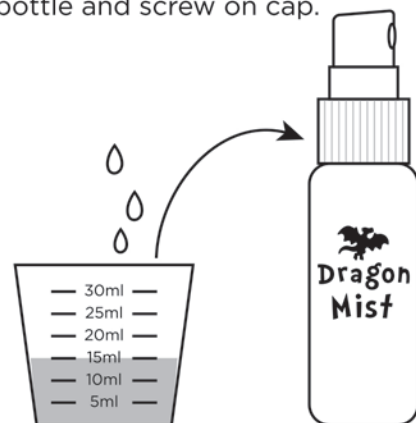

- 1** Empty 1 Fizzy Formula and 1 Baking Soda into a mixing bowl. Mix well.
- Empty the other Fizzy Formula and Baking Soda packet into another bowl. Mix well.

- 2** Have an adult remove the seal on the fragrance bottle. Add 10 grape-scented Dragon Drops to each batch using the dropper. Mix well.

- 3** Fill measuring cup with 15ml of cool water.
- Pour it into your Dragon Mist bottle and screw on cap.

- 4** Mist one batch of powder with water while stirring. Continue to spray and stir until the Dragon Mist is completely empty. Continue mixing for 1 min. using hands. *Mixture is ready when it clumps together when squeezed.*

Heat and humidity may affect the outcome of your bath fizzy. Start with the minimal amount of water recommended. Add additional mists of water as needed until the fizzy formula clumps together when squeezed. Too much water will cause your formula to activate - less water is better!

PRO TIP: Rotate the head on the Dragon Mist to get all the water out.

REPEAT STEPS 3-4 TO MAKE YOUR 2ND BATCH OF FIZZY FORMULA.

- 5** Put a few handfuls of yellow and blue mix from your 1st and 2nd bowl into your 3rd bowl and stir to create green! Separate your two mold trays.

Layer the 3 colors in the 6 egg molds to create striped bath fizzies. Put one magic grow sponge capsule into the center of each bath fizzy and push it into the powder.

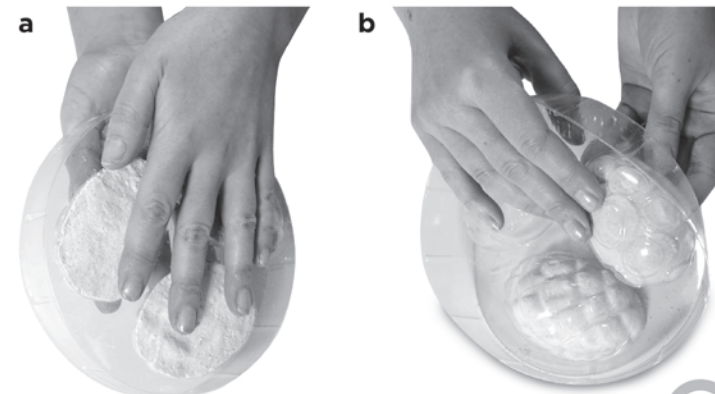

- 6** Fill the molds to the top and pack tightly. Continue filling and pressing until all 6 eggs are completely full and packed tightly. Let fizzies sit in a dry place for 8 hours or overnight. Dry times may vary.

7 Release from mold

Release after 8 hours or overnight, when fizzies are **completely dry**:

- Place your open hand on the top of the mold and slide your other hand under mold.
- Gently turn the mold over so the eggs can slide out. Lift mold slightly and use your fingers to lightly press on the plastic to push the dragon eggs out.

9 Storage

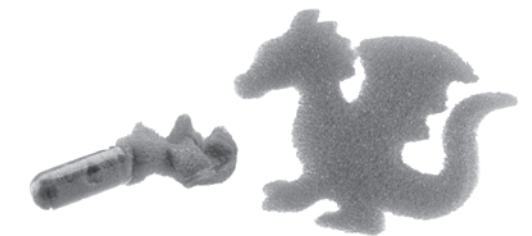

Store your dragon egg surprise bath fizzies in an airtight container or bag. Make sure to use the bath fizzies within 6 months.

8 Watch it hatch!

To use: Fill up the tub and drop in your bath fizzy. Soak in bath and watch for your dragon to hatch! When your bath is finished, retrieve your dragon sponge, then drain and rinse the tub.

Note: Temporary discoloration of the tub surface may occur. Adults should clean tub as needed following manufactures suggestions.

What makes a bath fizzy fizz?

Inside the bath fizzy, the citric acid and the baking soda hang out by themselves. The fun begins when they meet their new friend, water. The solids dissolve and combine together releasing carbon dioxide - that's when the bubble party begins!
