Notes for the Teacher

Why Diagnostic Testing?

Diagnostic tests are specifically designed to determine where a student should begin in the curriculum. Results from these tests give better direction for placement than a student's age or grade level since the course of study varies so much between schools and curricula.

What Portion of This Booklet Should a Student Complete?

This book covers four levels—500, 600, 700, and 800. Use this chart to decide which ones to work through.

Grade level of student	Work through levels
2-5	Use test booklet 100-400
6	*500
7	500-600
8	600-700
9	700-800

*Grade 6 students should also work through test level 400.

How Should the Test Be Administered?

Time. This is not a timed test. Students may take as much time as needed. Give periodic breaks, at least five to ten minutes every hour, and more often for younger students. Ideally, testing should be spread over a two-day period. Test weariness gives unreliable test results.

Guidance. You may help students understand instructions; however, do not hint at solutions to problems.

Calculators. There are no designated calculator exercises in this booklet. Calculators should not be used.

Environment. Inform students that the test is important, but avoid a tense atmosphere. Help them to feel that the best they can do is good enough. Check comfort factors such as lighting and ventilation. Keep noise and other disturbances to a minimum.

Progress. Since the different concepts in Sunrise Edition are learned incrementally and spread throughout the year, the test covers entire levels, not individual LightUnits. The activities in each test are grouped by concepts. The student should begin with the first concept and do as many activities as possible in each group.

How Do I Score the Test?

Using the answers in the teacher’s manual, put a mark through the number of each question the student answered incorrectly.

Determine the number of activities done correctly in each level.

How Do I Determine Placement?

Use the *Diagnostic Test Summary* page found on the next page of this book.

1. Fill in the **Diagnostic Test Summary** on page vii. If you are enrolled with Homeschool Plus at Christian Light Education, also fill in the second summary sheet on page ix. Tear out this perforated sheet and send it to Homeschool Plus and retain a copy for yourself. If you are not enrolled with Homeschool Plus, ignore the extra summary sheet.
2. **For Level 500.** If the student has 112 or more correct answers he should be ready for Level 600. If he has fewer than 112 correct, he is probably not ready for Level 600 but should begin with Level 500. If the number correct is near 112, you may want to check to see if his errors are mainly in one or two concept groups. If the student does well except for one or two groups, you may want to give him remedial work to prepare him for Level 600. But be careful—it is much better for a student to work more quickly through material that he can handle than for him to become frustrated with work that he is not ready for.

For Level 600. If the student has 70 or more correct answers he should be ready for Level 700. If he has fewer than 70 correct, he is probably not ready for Level 700 but should begin with Level 600.

For Level 700. If the student has 63 or more correct answers he should be ready for Level 800. If he has fewer than 63 correct, he is probably not ready for Level 800 but should begin with Level 700.

For Level 800. If the student has 70 or more correct answers he should be ready for Level 900. If he has fewer than 70 correct, he is probably not ready for Level 900 but should begin with Level 800.
