

TSS Quattro Telescope

Novus Monitor Arm Set

The Novus TSS Quattro enhances comfort by elevating four monitors to your ideal viewing height. It features ergonomic adjustability, a space-saving sliding arm design, and aluminum construction for durability. This German engineered monitor arm set increases your available workspace and is ideal for surveillance and control room applications.

Features | Benefits

- Enhances comfort by elevating four monitors to your ideal viewing height
- Improves ergonomics by easily adjusting each monitor's height, angle, and distance
- Increases available workspace by lifting monitors off the work surface
- Sliding arm design is ideal for placing monitors against a flat surface
- German engineered for durability in busy work environments
- Easily rotate monitors from portrait to landscape or share screens during collaboration
- Attach monitors quickly with Quick Release Monitor Mounts
- Integrated cable management hides cords for a clean, organized look
- Includes drilling screw base mount for secure placement

Easily support four monitors and adjust for viewing comfort.

QuickRelease connection makes it easy to relocate or upgrade monitors.

The TSS Quattro Telescope's space-saving design allows you to perfectly align four monitors for the most comfortable viewing position.

Monitor arms slide instead of bend to save space and allow for easy adjustments.

The anodized aluminum column includes cable clips for a clean look.

Included drilling screw mounts anywhere on the desk surface to provide firm support.
