

The diagram shows a cell with various organelles. The nucleus is at the top, containing a nucleolus. Below it is a mitochondrion with internal folds. To the right is the Golgi apparatus, and to the left is the endoplasmic reticulum. The cell is bounded by a cell membrane.

The diagram illustrates the structure of a cell, highlighting the nucleus, mitochondrion, Golgi apparatus, endoplasmic reticulum, and cell membrane.

FACTFILE

The diagram shows a cell with various organelles. The nucleus is at the top, containing a nucleolus. Below it is a mitochondrion with internal folds. To the right is the Golgi apparatus, and to the left is the endoplasmic reticulum. The cell is bounded by a cell membrane.
