PDU15SW8FNET, PDU20SW8FNET, PDU15SWHVIEC8FNET, PDU20SWHVIEC8FNET, PDU15M8FNET, PDU15MHVIEC8FNET, PDU20MHVIEC8FNET, PDU30SWVHVT24FNET, PDU20SWVHVT24FNET, PDU20SWVT24FNET, PDU30MVHVT24FNET, PDU20MVHVT24FNET, PDU20MVT24FNET, PDU15SWV16FNET

Version 2.2.1 (Release Date: November 18, 2022)

Features Improvements

- Improved compatibility with SSH certificates.

Fixes

- Resolves an issue using the software NESSUS (detects and scans for vulnerabilities) where the PDU “locks up” and stops working.
- Fixes a reboot issue when sending an email via Office365 SMTP server.
- Corrects a problem for users who cannot login with SSH via PUTTY.
- Resolves an issue where a login-fail event is not recorded when users attempt to login with mismatched IP.
- Repairs an issue with settings for daylight saving time.
- Fixes an issue where SNMP may not fully function when more than one user is set with the same community but with different IP addresses.
