

# 30-inch Plastic Enclosure

## NEW POSSIBILITIES FOR NEW TECHNOLOGY

Constructed with a robust, wireless transparent ABS plastic material, this lightweight and affordable enclosure is designed to integrate wireless devices into traditional structured wiring installations.

The durable enclosure mounts easily for both surface and recessed applications, and the hinged door attaches in seconds without the need for tools or a helping technician.

### Features:

- Made with ABS plastic, the enclosure is designed to integrate wireless devices without interference
- Universal mounting grid maximizes compatibility with 3rd party products without additional brackets
- Extra venting along the vertical plane of the door allows for superior heat dissipation
- Staggered mounting tabs allow multiple enclosures to mount in adjacent stud bays

### Benefits:

- **Single Solution.** Allows wired and wireless infrastructure to be integrated in a single cabinet.
- **Neatly Tuck Away All Your Home's Control:** Universal mounting grid and added depth maximizes 3rd party compatibility.
