

# JT'S STRONG ARM™

## JACK STABILIZERS

### PUT AN END TO UNWANTED CHASSIS MOVEMENT

Each JT's Strong Arm stabilizer tube bolts on to each landing gear leg and to the RV frame, forming a rigid triangle to eliminate unwanted chassis movement and provide a rock-solid camping experience.

**Whenever, wherever, we  
make your experience better.**

## PUT AN END TO UNWANTED CHASSIS MOVEMENT

### Eliminates annoying chassis movement

Like a rock-solid race car chassis, JT's Strong Arm jack stabilizers use triangles — the strongest shape in nature — to eliminate unwanted chassis movement. One end of each stabilizer tube attaches to each landing gear leg and the other to the RV frame, forming a rigid triangle.

### One-time installation

There is no welding required and no need to remove and reattach during setup. It's permanent! When parked, JT's Strong Arm jack stabilizers telescope into place with the jacks.

Designed to eliminate side-to-side and front-to-rear RV movement and shaking. Stabilizer bars form triangles at front and rear jacks to prevent shaking and swaying.

### Additional Features

- Provides a rock-steady camping experience
- One-time installation / permanently attached
- Works with all types of jacks
- Bolt-on installation — no welding required
- Standard 5th wheel kit - 58" and over between landing gear
- Short 5th wheel kit - under 58" between landing gear
- Travel trailer kit - does not include pieces for landing gear attachment
