Item # 118-T8, HoldRite - 118-T8

The HOLDRITE® #118-T8 is a Copper-Bonded™ bracket designed to support 1/2" and 3/4" tubing. This bracket mounts directly onto a horizontal or vertical pipe. It is designed to position water supplies for lavatories and other fixtures and is ideal as a mid span support within a 2-1/2" or wider wall. Packaged with a self-locking 2" stainless steel band and self-adhesive isolation felt. When used for copper tubing, solder directly to the bracket. Heat the tubing, not the bracket.

Specifications | Features

Specifications
