

**The Trailair® Air Ride pin box fits most standard mounting hardware and significantly dampens road shock to protect the RV.**

## Uncompromised ride and comfort

More than fourteen years ago, Trailair introduced air ride technology that would revolutionize the RV industry. Since then, many pin boxes have come and gone, but the Air Ride still stands tall as the leader in air ride technology. The Trailair Air Ride Pin Box acts as a buffer between the tow vehicle and RV, arresting the impact of road shock and stabilizing the towing performance. How? Simple — the unique scissor action allows the air bag to absorb road shock and vibration while the gas shock handles the rebound or bounce effect, giving RVers a better, smoother ride.

### QUICK FACTS

- Gas shock and air bag combination absorbs road shock and controls vertical movement created by bad road conditions
- Replaces all popular LCI pin boxes; 16K (1621), 18K (1621), 21K long jaw (1621), 21K (1716), 18K (0719) and 21K (1116)
- Protects from damage caused by road shock and vibrations, potentially saving owners costly repairs
- Provides a smoother, more comfortable towing experience
