

COMBUSTION LEAK DETECTOR

AIR VALVE

Allows air out
and creates suction

SQUEEZE BALL

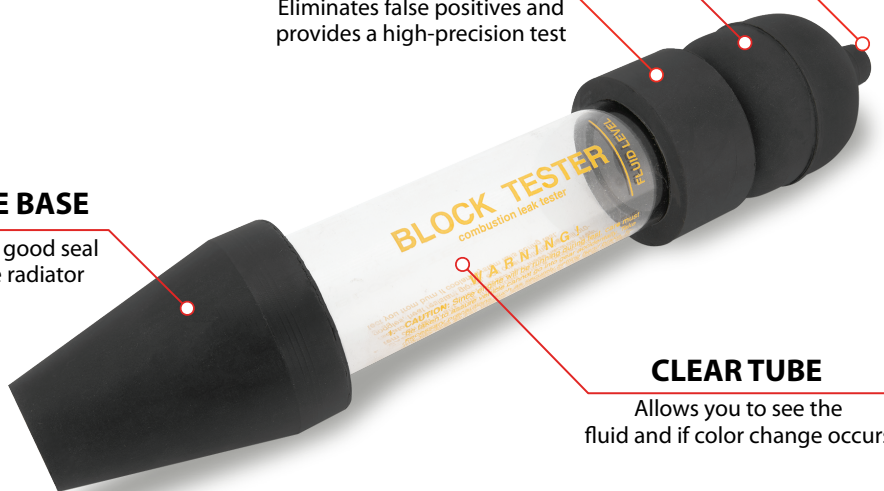

Pulls air from the
cooling system up
through the test fluid

DUAL CHAMBER

Eliminates false positives and
provides a high-precision test

CONE BASE

Makes a good seal
on the radiator

CLEAR TUBE

Allows you to see the
fluid and if color change occurs

Item #		Inner	Master	UPC	Packaging

- Tests for combustion leaks caused by a blown head gasket, cracked head or a warped sealing surface
- Use on a liquid-cooled engine with a removable radiator or overflow cap
- Tool with testing fluid (not included) tests if there are exhaust gases, (CO₂), in the cooling system
- Tester uses a dual-chamber, which eliminates false positives and provides a high-precision test
- Easy to use - if the test liquid changes from blue to yellow or green, there is a combustion leak, indicating a damaged head gasket

Fluid sold separately
