

# EasyMop Single-use Microfiber Mop

## Single-use Microfiber Mop

EasyMop Single-use Microfiber Mops are for customers that demand hygienic cleaning that only microfiber can offer, but find it hard to organize the necessary laundry logistics. These single-use blended microfiber mops deliver on-demand, high-efficiency cleaning on all types of surfaces, significantly reducing overall operating costs, especially in facilities where laundering is not available or desirable. These mops offer the convenience of single-use combined with excellent cleaning performance.

### Features & Benefits

- The premium, high quality, single-use microfiber material provides superior cleaning performance when laundering may be difficult or unavailable
- EasyMop can hold and distribute more liquid than a typical disposable mop, covering ~180 square feet, yielding cleaning results that are comparable to those of launderable textiles
- The EasyMops can be used damp or dry, allowing for excellent soil and pathogen removal
- EasyMop removes germs to help prevent cross contamination in critical areas and provide a healthier environment
- Offers fast room turnover without compromising quality
- No binding with quats, or other chemistries, for effective disinfection

### Applications

- Facilities demanding the hygienic cleaning that only microfiber can offer
- Facilities that would best benefit from a disposable, single use solution

### Safe handling

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use; and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDS are available online at [www.diversey.com](http://www.diversey.com) or by calling 888.352.2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
