

# 2010 NIST Cyber Security Conference

October 12-14, 2010 | Washington, DC

Registration: [www.nist.gov/cybersec](#)

**Keynote:** **Securing the Nation's Critical Infrastructure**  
The nation's critical infrastructure is under attack. The threat is real and growing. The consequences of a successful attack could be catastrophic. This keynote will explore the challenges of securing critical infrastructure and the role of the private sector in addressing these challenges.

**Workshop:** **Securing the Nation's Critical Infrastructure**  
This workshop will provide an overview of the challenges of securing critical infrastructure and the role of the private sector in addressing these challenges. It will also discuss the NIST Cyber Security Framework and how it can be used to improve the security of critical infrastructure.
