

The diagram shows a network topology with four nodes and several connections. The legend on the right side of the diagram defines the symbols used:

- A circle with a dot represents a node.
- A line with a dot at the end represents a connection.
- A line with a dot at the end and a small square at the other end represents a connection with a specific attribute.
- A line with a dot at the end and a small square at the other end, with a small circle at the top, represents another connection type.

LINGSTON

The diagram shows a network topology with four nodes and several connections. The legend on the right side of the diagram defines the symbols used:

- A circle with a dot represents a node.
- A line with a dot at the end represents a connection.
- A line with a dot at the end and a small square at the other end represents a connection with a specific attribute.
- A line with a dot at the end and a small square at the other end, with a small circle at the top, represents another connection type.
