### ●●●●● HELPFUL MEASURING HACK ●●●●●

*To help ensure tacks are evenly spaced, we developed a hack to make this step easier. Grab a blank white piece of paper or tracing paper, a writing utensil, a ruler and scissors.*

*The blocks below are sized to the dimensions noted in the above diagrams.*

*Place the blank piece of paper over the blocks below. Use a writing utensil to mark the corner of each block. Use a ruler to connect the dots of each block. Write the size inside the block and cut them out.*

*Align the cutout with the designated corner (shown above).*

*Use the sharp end of one of the tacks to make a small indent at inside corner of cutout.*

*After tack placement has been marked, install tacks using a rubber mallet.*

## STEP 15

**WARNING:** Check for pipes and electrical wiring before drilling.

**IMPORTANT:** If walls are not solid like brick, stone or concrete, you will require special fittings (not included). When in doubt, consult a professional.

Carefully measure the location of pilot hole before drilling and installing the unit.

- Place wall mounting strap against the wall and mark the position for drilling the hole.
- Using a power drill with a 6mm bit, drill a hole to 30mm depth. If the wall is softer, using a 5mm bit is recommended.
- Insert the wall anchor into the hole until the opening is flush with the wall.
- Secure the strap to the wall using the 25mm screw and washer.
- Use a 2mm drill bit to pre-drill a small pilot hole on the back of the furniture top. Secure the other end of the strap to the furniture using the 14mm screw and washer.
