

$\alpha = \alpha'$   
  $\beta = \beta'$   
  $\gamma = \gamma'$

The angles of the two triangles are equal.  
 The sides of the two triangles are proportional.  
 The area of the two triangles is proportional to the square of the ratio of their corresponding sides.

## QUESTION

$\alpha = \alpha'$   
  $\beta = \beta'$   
  $\gamma = \gamma'$

The angles of the two triangles are equal.  
 The sides of the two triangles are proportional.  
 The area of the two triangles is proportional to the square of the ratio of their corresponding sides.
