Multi-Function
Counter Top Ovens

These multi-function counter top ovens come with either a 12" x 3" or 16" x 3" opening. The multiple switch configuration allows for separate top / bottom heater control, enabling it to be used as a salamander, baker or oven. It has a convenient "stay on" feature that keeps the oven on and eliminating start-up time for high volume locations. It can also be used with the 60 minute timer that will shut it off for timed products. The oven has a temperature range of 90-550ºF degrees making it ideal for all types of cooking applications.

It is equipped with 3" long legs that make cleaning under it easy and convenient. Unlike ordinary counter top ovens, the fully insulated stainless steel cabinet will not reach an outside temperature of over 150ºF, thereby reducing the possibility of accidental burns.

Multi-Function Operation

Fully Insulated
Max Outside Temp: 150°F

Stainless Steel
Construction

3" Legs for Easy
Cleaning

Key Features:

- Fully insulated for safe outside temperature
