Important Information about the Tattoos and Markers: The tattoo transfers and markers are specially formulated from water-based, non-toxic, skin-friendly, soy-based inks. Tattoos should wear off in 1-3 days. They can be removed by applying adhesive tape and peeling off, as shown, or with rubbing alcohol on a cotton ball and dabbing them off. Plain old soap and water, a little soaking, and scrubbing will also work.

Tattoo Transfers

1. Select your design.

2. Cut along the printed lines on the back of the tattoo sheet with scissors.

3. Remove the top protective cover and apply art side down on skin.

4. Wet the sponge and hold it on the tattoo. Apply pressure for 30 seconds.

5. Slowly peel the paper off to see if the tattoo transferred. If not fully transferred, hold the wet sponge a little longer.

Once the tattoo is dry, it's time to color!
