

REUSABLE SUCTION CANISTERS AND DISPOSABLE LINERS

Reusable Outer Suction Canisters

Dynarex Resp-O₂™ Reusable Outer Suction Canisters are designed for holding inner-liners to safely collect and contain secretions and bodily fluids during suctioning. The rigid reusable Canister is precision-crafted from high-quality polymer materials. The Canister features a built-in bracket engineered for easy wall-mounting, and pre-attached vacuum tubing for secure connection with inner-liners.

- Features built-in adjustable on-off valve
- Clearly marked critical measure numbering
- Designed for use with disposable inner-liners
- Not made with natural rubber latex or DEHP

Disposable Suction Liners

Dynarex Resp-O₂™ Disposable Suction Liners are designed to effectively and safely collect and contain aspirated fluids and materials. Each high-quality, durable Liner features a patient-port elbow adaptor that allows quick and easy hookup and helps prevent tubing from kinking. The Liner is ultrasonically sealed to the lid—so no assembly is needed. Suction Liners require the use of a reusable outer canister.

- Ultrasonically welded shut-off valve helps prevent overflow and contamination
- Lid comes sealed and pre-assembled with pour spout, vacuum, and patient ports
- All port caps are engineered to create an air-tight snug seal
- Not made with natural rubber latex or DEHP
