

EASYGUIDE™

An innovative, easy, and safe way to load and unload your boat or PWC under 1500 lbs. into the water. Your boat intuitively guides in and out of the water from your trailer, giving you more time to enjoy the day without the worry of damaging your sideboards.

EVERYTHING YOU NEED IN ONE KIT

Made to Last

These boat trailer guides are built to take the wear and tear of launching your boat or PWC for many boating seasons. Made from a durable injection-molded nylon that is lightweight yet tough to keep your watercraft centered on the trailer.

Safe and Innovative

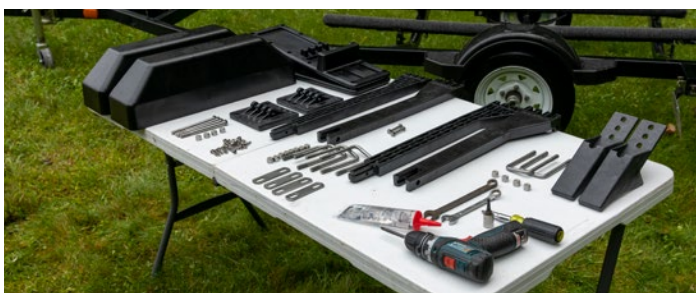

Designed by a boater who was frustrated with the time it took to load and launch his boat, the boat trailer guide poles are easy to use with no worries of damaging your boat or PWC. All you have to do is enjoy your day on the water.

Easy to Install

Installation is easy and takes less than 30 minutes for DIYers of all levels. The EasyGuide kit includes easy-to-follow instructions that will have you launching and loading your boat with no issues of damaging your boat or PWC.

Comes in a Kit

The EasyGuide includes everything you need including floats, attachment arms (four sections), stainless nuts and bolts (1/4"), trailer plates and sealant. Installation with typical tools (not included) takes 30 minutes or less to install.

Works in Any Conditions

You no longer have to worry about the current or wind when getting your boat in or out of the water. The boat trailer guides are sturdy, strong and stay in place the first time.
