Creativity for Kids

The paint included is a specially formulated non-toxic, acrylic paint that dries permanently on most surfaces, so be careful. Cover your work surface with newspaper. Have a cup of water and paper towels handy. Wear a smock or old clothes. This paint may stain. Clean up any spills immediately with soap and water. Paint can settle and separate over time. Mix each color thoroughly before you begin painting. If the paint seems too thick, stir in a drop or two of water. Before changing colors, rinse and dry your brush thoroughly.

Note - we have included enough clay for a child-sized hand. If your want to create a larger print, you will need to purchase an additional kit. Important Information about the Paint

CHOKING HAZARD - Small parts. Not for children under 3 yrs.

## Design Time

**Before you start:** Make sure your hands and work area are super-clean. You may want to use a paper plate, foil or plastic wrap as your work surface.

- Tip Use the thickest piece of clay to get the best impression. If you flatten your clay too thin your print will be difficult to see.
- Your clay will begin to dry as soon as it is removed from the package, so work quickly. If you are not able to complete the activity, be sure to wrap the clay in plastic wrap or a sealed bag to keep it moist.

## For a Child's Handprint

- Form your clay into a circle that is slightly larger than your handprint.
- Press your handprint firmly into the clay. Use your other hand to push down each finger and thumb. Remember to get the best impression you will need to make sure each section of your hand is firmly pressed into the clay.
- Carefully pull your hand out. You may need to gently peel back the clay as you do this.
- Add a hole to the top of the piece with the handle end of your paintbrush. Be sure this hole is at least 1/2 inch away from the edge of the clay.
- Let the clay dry for a couple of hours.

## Making a Pet Print

Are you a pet lover? You can also make a keepsake paw print with your favorite furry friend. Important Note – not all pets like to craft. Be sure your pet is happy and willing to participate. Ask an adult to help you when you are crafting with a pet. If your pet is not cooperating –take a picture of him instead.

- Your pets paw must be completely clean, dry and free from dirt.
- Form the clay into a circle that is slightly larger than your pet's paw. If your pet is very small, you can have a larger border of clay around the paw print, or you can store the extra clay in a sealed plastic bag to use later.
- With adult assistance, use gentle but firm pressure. Be sure each section
  of the paw is pressed into the clay. Remember don't push too hard or
  your pet may get angry.
- Follow the directions above for adding the hole for your ribbon.
   Set your print aside to dry.
