

Bathtub Trim Kit with Snap-On Faceplate

Note: Compatible with Jones Stephens' quick test style bath waste kits.

Parts List

- | | |
|---------------------|-----------------|
| A. Stopper Assembly | C. Drain Gasket |
| B. Spud | D. Faceplate |

Note: Depending on the model, the package includes a faceplate and a drain or a faceplate and a stopper.

Additional Parts Needed

- Pliers

Installation Instructions

1. To install the faceplate (D), snap it onto the existing retainer nut, making sure that the slot is facing downward.
2. To install the stopper assembly (A), insert it into the existing drain.
3. To install the drain (B-C), place the drain gasket (C) underneath the tub and screw the drain spud (B) into the existing drain elbow, through the drain gasket (C). You can use a pliers to help install the spud.
