

GLOW IN THE DARK

SAND ART

ROCKET

LET'S GET STARTED!

Your Sand Art set includes a rocket bottle, colorful sand, glow sand, fun foil accents, glow-in-the-dark stickers and a glowing alien friend.

SAVE THE BOX!

This will be used for your *less-mess, more fun* crafting station.

IMPORTANT

- Keep sand away from your eyes, nose and mouth. If contact occurs, rinse with water.
- Cover your workspace with newspaper or a towel.
- When creating your Sand Art, the bottles must be filled to the top. Over time the sand will settle. Add more sand as needed.
- Hold the funnel with one hand while pouring with the other. To get even layers, tilt the funnel slightly to the sides.
- Use the glow sand to create a thin accent layer between colors.
- Seal the bags between layers to keep the sand from spilling.

ADDING THE SAND

Young children may need help with this step.

- Place the rocket bottle inside the box. Set the cap aside.
- Place the funnel inside the bottle.
- Decide on a color pattern for your Sand Art. Open the bag of sand and begin filling the rocket, alternating colors and glow sand as you go. Stop when the rocket is completely full.
- Add the cap and set it aside.

Important – Use a damp cloth to clean sand from the outside of your bottle. Make sure the bottle is completely dry before adding stickers and accessories.

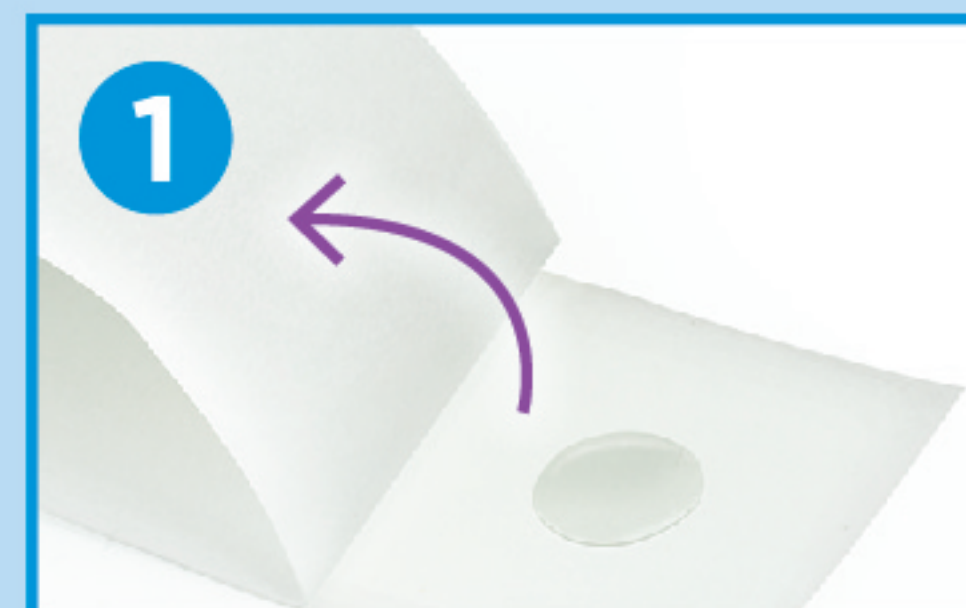

2

DECORATE THE ROCKET

- Carefully add the foil accents and stickers, as shown.
- Now take your alien and place it inside the rocket. *Ready for take-off!*
- Hold your rocket and alien close to a light source, turn out the lights and watch them glow!

If you would like to attach the alien inside of the rocket, apply adhesive dots as shown.

CREATIVE PLAYTIME

- You can take the alien out of the rocket and use both pieces as props for creative play. Let your imagination take you on new space adventures!
