

The diagram illustrates the structure of a plant cell. The cell is bounded by a thick **cell wall** and a **cell membrane**. Inside the cell, there is a large, clear **vacuole** that occupies most of the space. A **nucleus** is visible as a dark, circular structure. **Chloroplasts** are shown as small, green, oval-shaped organelles. The **cytoplasm** is the fluid-filled interior of the cell.

## FALCETILE

The diagram illustrates the structure of the falsetto, which is a type of voice production. It shows the vocal cords and the larynx, which are the organs of the voice. The falsetto is produced by the vibration of the vocal cords.
