

The diagram shows a 3D coordinate system with axes labeled x , y , and z . A point is plotted in the first octant. Dashed lines indicate the projections of this point onto the xy -plane and the yz -plane. A vertical line segment connects the point to the xy -plane, and a horizontal line segment connects that point to the yz -plane.

QUESTION

The diagram shows a 3D coordinate system with axes labeled x , y , and z . A point is plotted in the first octant. Dashed lines indicate the projections of this point onto the xy -plane and the yz -plane. A vertical line segment connects the point to the xy -plane, and a horizontal line segment connects that point to the yz -plane. A blue box highlights the vertical segment.
