

THE BATTERY

1. The battery is the source of electrical energy for the vehicle.

2. It provides the initial surge of current to start the engine.

3. It supplies power to the vehicle's electrical system when the engine is not running.

4. It stores energy to be used when the engine is running.

5. It provides a steady flow of current to the vehicle's electrical system.

6. It is a rechargeable device that can be used repeatedly.

7. It is made up of several cells connected in series.

8. Each cell contains a lead anode and a lead dioxide cathode.

9. The electrolyte is a mixture of sulfuric acid and water.

10. The battery is designed to last for several years.

11. It is a critical component of the vehicle's electrical system.

12. It is located in the engine compartment.

13. It is connected to the vehicle's electrical system by cables.

14. It is a vital part of the vehicle's operation.

15. It is a key component of the vehicle's powertrain.

16. It is a critical part of the vehicle's safety system.

17. It is a vital part of the vehicle's emissions control system.

18. It is a key component of the vehicle's air conditioning system.

19. It is a vital part of the vehicle's power windows system.

20. It is a key component of the vehicle's power locks system.

21. It is a vital part of the vehicle's power mirrors system.

22. It is a key component of the vehicle's power seats system.

23. It is a vital part of the vehicle's power steering system.

24. It is a key component of the vehicle's power windows system.

25. It is a vital part of the vehicle's power locks system.

26. It is a key component of the vehicle's power mirrors system.

27. It is a vital part of the vehicle's power seats system.

28. It is a key component of the vehicle's power steering system.

DISASSEMBLY

1. The component is a curved metal bracket.

2. It is used to mount the battery to the vehicle's frame.

3. It is made of steel or aluminum.

4. It is designed to hold the battery in place and prevent it from moving during driving.

5. It is a critical part of the battery's support structure.

6. It is a key component of the battery's mounting system.

7. It is a vital part of the battery's safety system.

8. It is a key component of the battery's electrical system.

9. It is a vital part of the battery's powertrain system.

10. It is a key component of the battery's air conditioning system.

11. It is a vital part of the battery's power windows system.

12. It is a key component of the battery's power locks system.

13. It is a vital part of the battery's power mirrors system.

14. It is a key component of the battery's power seats system.

15. It is a vital part of the battery's power steering system.
