

The graph shows the number of people in the workforce from 1980 to 2010. The x-axis represents years from 1980 to 2010 in 5-year increments. The y-axis represents the number of people in the workforce, ranging from 0 to 100 million in increments of 20 million. The line starts at approximately 60 million in 1980, rises to about 70 million by 1985, then shows a significant dip to around 55 million by 1990. It then recovers, reaching about 85 million by 2000 and peaking at approximately 95 million in 2010.

## QUESTION

The image shows a person in a white lab coat and mask, likely a scientist or researcher, standing in a laboratory setting. The person is looking towards the camera.

Below the image is a blue button with the text "ANSWER" in white.
