

Figure 1. Schematic of the experimental design. The subjects were first exposed to a sequence of stimuli (red, green, blue, red, green, blue) and then to a sequence of stimuli (red, green, blue, red, green, blue) during the conditioning phase. The subjects were then exposed to a sequence of stimuli (red, green, blue, red, green, blue) during the test phase. The subjects were also exposed to a sequence of stimuli (red, green, blue, red, green, blue) during the control phase.
