

ClearVue™ Pump P-Trap Insert

Thank you for your purchase of this condensate pump. This pump is not only designed for use in air conditioner applications but also with dehumidifier. To ensure this pump operates properly, please be aware of this information. This condensate pump is designed for condensate water up to 140°F continuously. When using this pump with a de-humidifier, please install a P-trap in the condensate drain line before the pump to help ensure correct operation.
