

Figure 1. Schematic representation of the experimental design. The Control group (solid line) and the Experimental group (dashed line) were trained on the task. The Control group was trained on the task for 10 trials, and the Experimental group was trained on the task for 10 trials. The Control group was trained on the task for 10 trials, and the Experimental group was trained on the task for 10 trials. The Control group was trained on the task for 10 trials, and the Experimental group was trained on the task for 10 trials.
