

The modular Novus Tetra Support System (TSS) monitor arms and mounts provide unlimited options for custom configurations. Whether in the office or control center, TSS provides secure, flexible solutions for any workstation.

The TSS folding arm III is a two-part monitor arm with a range of 19.88". Constructed of high quality aluminum and metal, the Folding arm III can hold one monitor weighing up to 33 pounds. Articulated joints increase the posi-

tioning possibilities. The joints can be tightened to hold the arm in position.

All TSS arms and mounts are equipped with the Quick Release monitor mount. Quick Release allows you to snap your monitor into place and slide a spring-powered lever to release it easily. The ball joint allows the monitor to be tilted smoothly to the ideal viewing position. Cable routing clips are included to ensure an organized appearance.

Item Number	Base Option	Capacity	Range
965+0119+000	Novus Quick Release	33 lbs	19.88"

**FEATURES**
