- Vocabulary

## Supplement your curriculum with teacher-led, manipulative-based lessons

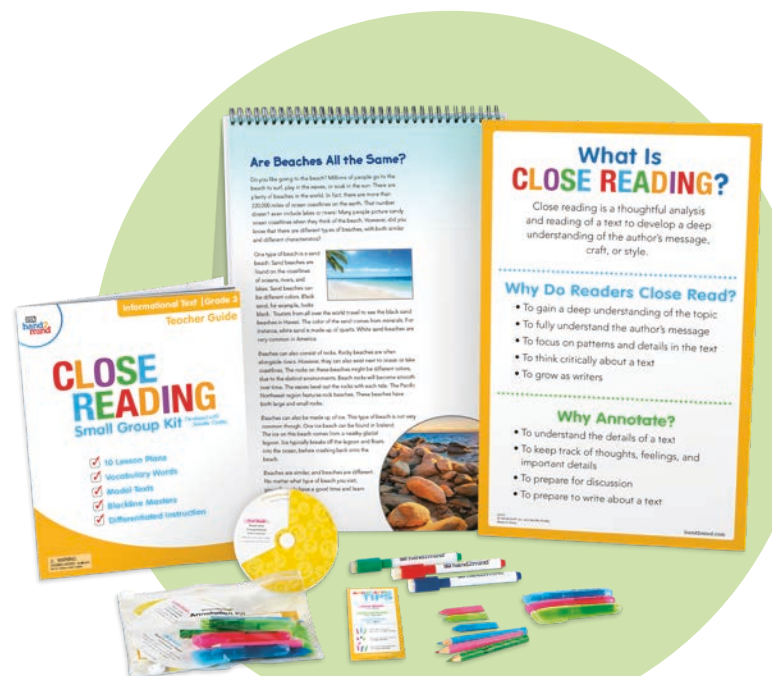

### Reading Strategies Toolkits (K-2)

Reading Strategies Toolkits build foundational reading skills through hands-on activities focused on 3 core areas—conceptual understanding, fluency, and application. Develop fluent readers with hands-on strategies using 6 engaging manipulatives!

### Close Reading Small Group Kits (3-5)

Close Reading Small Group Kits are teacher-developed, small-group literacy kits that teach critical reading skills by using tools and hands-on strategies to create meaningful interaction with text. Tackle complex text with a hands-on reading routine!

# Hands-on practice

to reinforce key literacy skills and increase proficiency  
with centers & independent work

## Differentiated Literacy Centers (K-5)

Differentiated Literacy Centers kits streamline the planning for centers rotations with hands-on activities designed to reach students at all levels of learning. Easily incorporate differentiation that engages all learners in literacy!

## VersaTiles® (K-6)

Versatiles combines hands-on, engaging activities with standards-aligned skills practice to reinforce and extend key literacy concepts for all learners. Bring this hands-on, self checking literacy skills practice to your classroom!

## Reading Rods (K-5)

Explore literacy concepts by manipulating letters and words to develop words and sentences! Build vocabulary and phonemic awareness through word work, sentence construction, and more.

All products support SEL

# Reach all learners with a hands-on approach to literacy

- Hands-on learning cultivates empathy, fosters resilience, encourages creativity, and promotes cognitive processing.
- Young children learn initially through their senses, so their learning environments should provide opportunities for them to see, hear, touch, and connect with their surroundings.
- Using manipulatives and incorporating physical movement into learning activities is a proven successful strategy for language acquisition.
- The educational theory of constructivism is rooted in the belief that children learn best when they experience things firsthand and within a meaningful context.
