

QUESTION 25 (10)

Which of the following is NOT a function of the cell wall?

1. To provide structural support and protection

2. To regulate the movement of substances in and out of the cell

3. To store genetic information

4. To maintain the cell's shape and prevent bursting

5. To facilitate cell-to-cell communication

6. To anchor the cell to its surrounding environment

7. To provide a barrier against pathogens

8. To store nutrients and waste products

9. To regulate the cell's internal pH

10. To provide a site for photosynthesis

11. To facilitate the cell's attachment to other cells

12. To provide a site for cell division

13. To regulate the cell's internal temperature

14. To provide a site for cell signaling

15. To provide a site for cell growth

16. To provide a site for cell differentiation

17. To provide a site for cell death

18. To provide a site for cell migration

19. To provide a site for cell adhesion

20. To provide a site for cell communication

21. To provide a site for cell signaling

22. To provide a site for cell growth

23. To provide a site for cell differentiation

24. To provide a site for cell death

25. To provide a site for cell migration
