

ENDOTRACHEAL TUBE INTRODUCER (BOUGIE)

Dynarex Resp-O₂™ Endotracheal Tube Introducers (Bougies) are premium medical devices designed to effectively guide and support endotracheal tubes during difficult intubation procedures. The sterile Introducer is disposable and comes individually wrapped for optimal hygiene.

- Designed to guide and support endotracheal tubes into patients' airways
- Ideal for difficult intubations and “blind” intubations
- Crafted from high-quality plastic materials for optimal durability
- Features clearly visible depth markings for improved safety
- Available in Child and Adult sizes
- Disposable and individually wrapped for optimal hygiene
- Not made with natural rubber latex
