

FINGERTIP PULSE OXIMETERS

Dynarex Resp-O₂™ Fingertip Pulse Oximeters are premium-quality, non-invasive devices designed to effectively measure pulse rate (PR) and blood oxygenation levels (SpO₂). The Pulse Oximeters are designed to fit fingertips comfortably and securely and feature easy-to-read displays for optimal visibility. These compact Oximeters are lightweight and feature a convenient lanyard for easy portability.

- Designed to provide effective measurement of pulse rate and blood oxygenation levels
- Large font display allows for accurate reading
- Constructed from durable materials for reliable performance
- Includes convenient lanyard for easy portability
- 36400: Adult size, suitable for all ages (finger thickness 9-22 mm)
- 36402: Pediatric size (ages 3 and up) with child-friendly teddy-bear design (finger thickness 7-15 mm)
- Not made with natural rubber latex or DEHP
