Complete Awning Assemblies

- Easy installation
- Optional manual override
- Adjustable Friction Joint standard
- Available in power and upgraded manual versions
- Designed with fewer moving parts for better reliability

Enhance your RV experience with innovative awning features

Speaker Upgrade Kit

Listen to the big game or your favorite musician while relaxing outside under the shade of your Solera® RV Awning. The patent-pending Solera Awning Speakers are housed inside the awning heads and provide excellent sound quality by directing sound to the campsite.

Friction Joint

- Standard on all Solera Awnings
- One-handed adjustment
- One end can be pitched to drain accumulated rainwater and does not have to be readjusted before retracting
- Tension preset for easy water dump
- Instead of locking in place, the friction joint flexes to greatly reduce the likelihood of wind damage

Only RV awning with a speaker built in to the head!

Add charming ambiance to your campsite with the ultra-efficient Solera LED Awning Light Kit!

Replacement Fabrics

Available in a variety of colors and standard width options.

**Roller assemblies and hardware are NOT included.*

Quick Facts:

- Anti-scurf and anti-mildew
- Cold-crack protected to -25°F
- 500 x 500 fabric denier at 13.5 oz/square yard

Solera Sliders

Designed to fit rooms from 56" to 188" in length and extend up to 48". The hardware hole pattern is universal and will match most competing brands. Comes complete with mounting hardware.

Quick Facts:

- Easy installation
- Helps keep slide room free of dirt, leaves and debris
- Cost-effective alternative to other slide-out awnings
- Permanently attached and automatically extends/retracts with slide-out
- Solera Sliders extend up to 48" — that's 6" more than competing brands!

Note: Does not include awning rail.
