DESCRIPTION

The HME is disposable single-use device indicated for tracheostomy patients requiring humidification. The HME is for use in hospital, respiratory therapy, and homecare. The HME can be used on adult and pediatric patients. The HME is indicated for use only under the supervision of qualified medical personnel. The HME is designed for disposable use and should be changed at least every 24 hours.

INSTRUCTIONS FOR USE

- Read these instructions carefully before using the product.
- Place the HME onto the tracheostomy device connection piece.
- When used continuously on the patient, change the HME every 24 hours or more frequently as required.

CONTRAINDICATIONS

- The HME is contraindicated in patients producing fulmination, frothy secretions within their airway and lungs.
- The HME shall not be used on patient with tidal volumes of less than 75 mL, for example neonates.

PRECAUTIONS

- The HME shall be properly attached and checked for leakage prior to use.
- Before use, verify that the HME has no occlusions and that air will flow through it.
- During the use of the HME, the patient shall be monitored and proper airway care administered if complications arise.

WARNINGS

- HME is designed for single use only and should not be cleaned and reused.

TECHNICAL DATA

Tidal Volume Range	75-1500 mL
Resistance	at flow 30 L/min 0.2 cm H ₂ O
Dead Space	12 mL
Moisture Output	Tidal Volume = 250 mL ~ 34.9 mg H ₂ O/L 500 mL ~ 32.9 mg H ₂ O/L
Weight	4.8 g
Connections	15F
