

## STETHOSCOPES

Dynarex Single, Dual, and Sprague Stethoscopes are designed for the reliable detection of bodily sounds during patient assessments. Each stethoscope features a high-quality anodized aluminum chest piece with a non-chill ring for improved patient comfort. Molded ear tips and thick tubing minimize background noise for greater acoustic clarity.

- Effectively detects high and low frequencies for comprehensive patient assessments
- Medical-grade anodized aluminum chest piece with non-chill rim for patient comfort
- 22" flexible tubing minimizes background noise and enhances sound clarity
- Molded ear tips provide a secure fit and improved acoustic performance
- Not made with natural rubber latex
