Tutu PHOTO LIGHTS

Brighten and personalize your room with these super cute photo clip lights. Decorate light strand with shimmery tutu to add a sparkly touch of room decor even with the lights off!

You will need 2 AA batteries

Battery Cautions

- Do not charge non-rechargeable batteries.
- Do not mix different types of batteries or new and used batteries.
- Only use batteries of the same or equivalent type as recommended.
- Batteries are to be inserted with the correct polarity (+ and -).
- Exhausted batteries are to be removed from the toy.
- The supply terminals are not to be short-circuited.
- Packaging and instructions must be kept since they contain important information.

Installing the batteries

- With adult help, insert the batteries into the battery pack as shown. Be sure to match up the + and - markings on the battery pack with your batteries. Slide the cover back on.

LET'S BEGIN

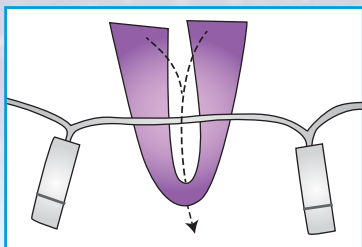

Cover your work surface. This will help catch any loose glitter from your fabric. You will be attaching the fabric strips to your light strand. You can group the fabric by color or create your own unique pattern. For ideas, refer to the pictures on the box.

KNOTTING THE TULLE

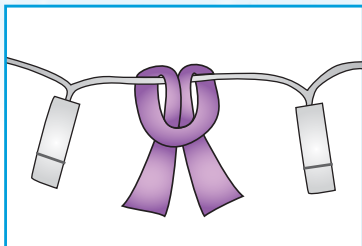

To attach the tulle, you will learn a simple loop technique called a "Larks Head Knot". To begin, lay out your light strand with the bulbs on your work surface and the clips facing down.

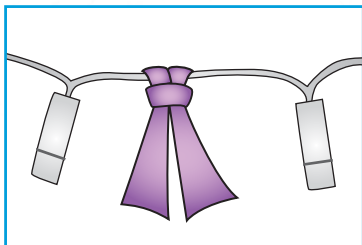

1. Fold one strip of tulle in half forming a loop. Place it beneath your light strand with the tails facing up.

2. Hold the loop and use your other hand to bring the tails over the light strand and down through the loop.

3. Pull the tails tight and slide the loop towards the light strand to secure the knot.

4. You have just completed a Larks Head Knot! Repeat this step across the strand. **Add 5 tulle strips between each light clip and 3 strips between the last clip and the battery box.**

TRIM PHOTOS

Ask adult permission before cutting any photos.

Select 10 photos or images you'd like to display on your light strand. Decide which frames will work best with each picture.

If your picture is larger than the frame, turn the frame over. Use a pencil to trace the outside of the frame onto your photo.

Cut just inside the traced line to trim your picture to the size of the frame.

Line up the frame on top of the photo and clip it using a light clip. Repeat this process for the rest of your images. If the pictures curl, you may use a small piece of tape to stick them to the back of the frame.

Decorate your frames with rhinestones. Use the double-sided tape square to cover the battery box with a heart.

DISPLAY

***Always ask an adult before applying the sticky hooks to the wall.**

Drape the lights around your mirror, headboard or window, or use the sticky hooks to hang your lights. Remove the protective paper from the back then apply the sticky hooks with the opening facing up. Slide the wire of your lights into the opening as pictured.

Use the switch to turn on your lights to flashing or solid. Now step back to admire your new sparkly room décor! When you are ready for a change, add new artwork, photos or notes as you desire.
