Speed and versatility for many applications

3M[™] Scotch-Weld[™] Hot Melt Adhesives and Applicators are advanced hand-held systems to help you improve productivity, lower cost, and minimize waste.

Adhesives are 100% solids thermoplastic resins that become fluid when heated and quickly wet the bonding surface. They cool, harden, and reach bond strength in seconds. You can move assemblies immediately to keep production flowing. This helps eliminate clamps, fixturing and drying, and saves time, energy, and space.

Each adhesive is designed and precisely manufactured for efficient use in one of the portable 3M[™] Scotch-Weld[™] Hot Melt Applicators. Bond wood, plastic, foam, fabric, cardboard, and more.

Combine 3M[™] Scotch-Weld[™] Hot Melt General Purpose Adhesive 3750 and the 3M[™] Scotch-Weld[™] Hot Melt Applicator AE II for a high volume system at a great value. Easily keep up with demanding packaging and wood assembly applications.

3M[™] Scotch-Weld[™] Hot Melt Applicator EC can be used with 3M low temperature (265°F/129°C) adhesive to effectively bond heat-sensitive substrates such as styrene foam.
