

FIRST SUDS™ INFANT TO TODDLER TUB

Y7854 Instruction Manual

**READ ALL INSTRUCTIONS BEFORE USING.
KEEP THESE INSTRUCTIONS FOR
FUTURE REFERENCE.
FOR HOUSEHOLD USE ONLY.**

NOTE: The sling is only for use with First Suds Tub. Do not use the sling on any other device.

Birth to 25 lbs.

Sling: Birth until able to sit up unassisted.

⚠ WARNING

Drowning Hazard: Babies have **drowned** while using infant bath tubs and infant bathtub slings.

To prevent drowning:

- **Stay** in arm's reach of your baby.
- **Never** rely on a toddler or preschooler to help your baby or alert you to trouble. Babies have drowned even with other children in or near bath tub.
- Babies can drown in as little as **1 inch** of water. Use as **little water as possible** to bathe your baby.
- Use in **empty** adult tub or sink.
- Keep drain **open** in adult tub or sink.

Fall Hazard: Babies have suffered head injuries falling from infant bath tubs and infant bath slings.

To prevent falls:

- Place tub **only** on level surface in sink or adult tub.
- **Never** lift or carry baby in tub or in infant sling.
- **Never** allow other children to substitute for adult supervision.
- **Discontinue** use of sling when child can sit up unassisted.

Important: Never place child in tub until you have tested the water temperature by touch.

Note: Typical water temperature for a bathing baby should be between 90°F and 100°F

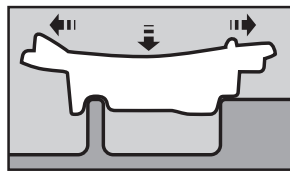

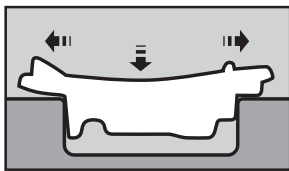

To Use Bath Sling:

1. To prevent overflowing, always confirm that the tub plug is open before attaching the sling.
2. Attach the sling by hooking the four tabs to the outer rim of the tub. There are two lined areas on each side of the tub to show where the tabs should sit.

Important: Be sure the entire sling is secured in place by turning the tub upside down to confirm it is fully attached to the rim of the tub.

To Position Tub Onto The Kitchen Sink:

Place the toddler seat side of the tub on one side of your sink's edge and the baby recline side of the tub on the opposite side of your sink. **NOTE:** In larger sinks, the tub may be able to fit fully inside the sink.

CAUTION: Before using, check to ensure product is firmly positioned.

1. Shift tub to one side as far as it will go.
2. Push down firmly to confirm tub stability in this position.
3. Shift tub in opposite direction as far as it will go, and repeat step 2.

CAUTION: If tub does not feel secure after this test, do not use in sink. Use on a flat level surface instead.

To Use Grow With Me Modes

INFANT: The sling is designed to allow you to easily give your newborn sponge baths.

NOTE: Until the umbilical cord stump has healed, you should avoid getting this area wet.

BABY: When your baby outgrows the sling, you will start using the reclining end of the tub. In this mode, your baby's buttocks should rest at the raised center of the tub. This helps to support your child in a semi-upright position.

TODDLER: Once your child is able to pull up to a sitting position, switch them to the upright toddler seat at the opposite end.

Discontinue use if product becomes damaged, broken or disassembled.

To Clean & Store:

Clean tub and sling with damp cloth, mild soap and warm water. Rinse and let air dry before storing.
